Working Experience

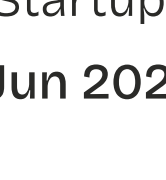

Zettabyte Pte Ltd.

Software Development Company
Mar - Jun 2021 · Front-End Engineer

Working as Internship UI/UX Designer and Front-End. I was given a task to redesign one of their product, ADMTC a website platform to manage education in France. Together with the team with just **1.5 months**, we manage to complete the website design, and the front-end code. My approach was user-centered design that involves user directly to the phase of the product redesign.

What I learned:

- Git & Github
- Angular basics
- HTML, SCSS, JS
- Figma & Basic Design

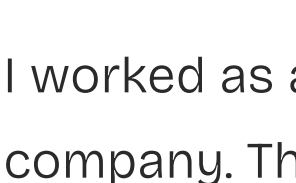

Destar Studio.

Startup IT Company
Jun 2022 - Jul 2023 · UI/UX Engineer

My position was Internship UI/UX Designer and Front-End. My responsibilities was to construct a travel website app that provides plane ticketing, tour program, car rental, hotel booking, etc. I uses design thinking method to construct the product to discover user needs and pain points.

What I learned:

- Tailwind CSS
- HTML, JS
- Figma & Basic Design

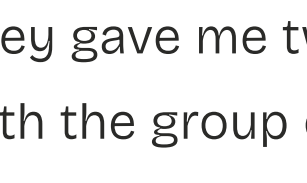

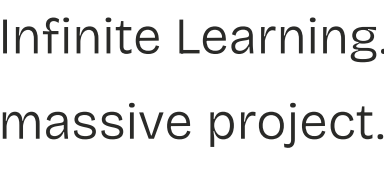

Serene Bali

Startup Property Management Company
May 2024 - Jan 2025 · Web Development.

I worked as a Freelancer Fullstack Website Developer in this company. The company requires a website for operational and manage the property listings also consultation platform for their users. My approach is using a design thinking method to construct a useful application for the user.

What I use for this project:

- Tailwind CSS
- Laravel
- MySQL
- AlpineJS
- Backend ORM Eloquent
- Figma
- Usability Testing

Infinite Learning

Web & UI UX

Aug 2024 - December 2024 · Project Manager

During my 5th semester, I did intern & independent study in Infinite Learning. They gave me two tasks, a mini project and a massive project. With the group of 6 members include me. I lead the team as a project manager and I also responsible for the backend. We decided to built an application that provides education about modern farming for traditional farmers and Gen Z to improve agricultural sector in Indonesia.

Tech & Tools utilized in this project

- Notion
- React
- Tailwind CSS
- Node Js (Express Js)
- Figma
- Maze
- MySQL
- Vercel, Railway (Hosting)

PT Gojek Tokopedia Tbk.

One of the biggest company in Indonesia.
May 2025 - Dec 2025 · Data Scientist Intern

I tried to get out to the comfort zone and made it as Data Scientist Intern At GoTo. One of the best company in Indonesia. I helped my mentor to prepare data, data labelling, model evaluation testing, and data creation. I spend 10 months learning working in this field and now I am able to understand what data scientist do in the industry.

What I utilize for this project:

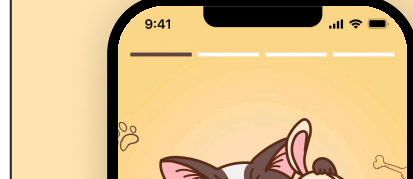

- Python (For scrapping, automation, data cleaning)
- Google Sheet (To visualize data)
